

PROJECT PROFILE

ROPER AND WILTON BRIDGES ROAD ALIGNMENT – CONSTRUCTION CAMP

Situated 600km southeast of Darwin, the project involved the design, manufacture, transportation, and installation of a temporary accommodation facility for fifty construction personnel working on new infrastructure in the area. This included camp layout design, building design, supporting infrastructure configuration design, and project management of subcontractors for electrical, plumbing, and air-conditioning works. Northern Transportables provided ensuited bunkhouses, messing facilities, recreation facilities, laundry, and offices. The project was executed within a short timeframe, completing on time and within eight weeks from the contract award.
