

## PROJECT PROFILE

### ROY HILL - MINE SITE RAIL CAMP

---

The scope of work included the design, engineering, manufacture, transportation of materials across an impressive 3500 km, and installation of a 400-room mine site camp, nestled away in the remote expanse of Pilbara Region.

The project also featured a dining area, office, recreation, gym, tavern, and maintenance facilities. Additionally, the camp is equipped with underground services, power station, wastewater treatment facility and spray field, and a water treatment facility
