

PROJECT PROFILE

DRIPSTONE CHILDREN'S CENTRE

Dripstone Children's Centre located in the coastal suburban setting with the Charles Darwin University and the Royal Darwin Hospital in close proximity.

Fitting in with the relaxed tropical ambience of the centre's green nature vibes, the semi elevated demountable is clad with Territory tough exteriors and has a verandah wrapping around the face to offer shade and cooling for the internal class rooms. A ramped entry allows access for all abilities.

Inside the light filled rooms have custom cabinetry built in seamlessly with endless storage capacity and open floor space for the kids and educators to move with ease. The end room has stunning picture windows that frame the tropical gardens and allow the light to bounce in off the natural timber look flooring. The exterior windows are glazed for efficiency. The rooms flow seamlessly from one to the next with glass panelled internal doors for visibility and function. The bathrooms are completely child friendly with built in change tables and sinks along with SS toilet options, a disabled toilet and laundry room as well.

Included in the build are internal offices and spaces for the staff with internet connections and AC throughout.
