

## PROJECT PROFILE

## HOMEBUILD

The Homebuild Project is to deliver prefabricated homes to remote communities throughout the Northern Territory consisting of 3 & 4 Bedroom homes.

### Scope of work included:

- Design of suitable housing solutions fit for remote living which can be prefabricated in Darwin
- Manufacture of 3 & 4 bedroom homes, steel frame configuration
- Storage of the buildings ready for mobilisation
- Relevant authority approvals to enable the installation
- Engaging with local community and provide training
- Engaging with local community businesses to facilitate scope where possible
- Installation of buildings including structural and cosmetic connections
- Clearing of sites
- Civil pad preparation
- Landscaping
- Installation of Fencing
- Connection of services
- Occupancy Certification

*This project has been a fantastic success for all involved, including the engagement of **40% plus indigenous workers** and the participation of the Sentenced to a Job program.*

*The methodology of the construction platform was designed so detailed training of non-skilled personnel could be safely carried out across all construction activities.*
