

PROJECT PROFILE

RAIL CAMP 95

Design, Construction & Installation of Mine Site Rail Camp. This facility is Standalone off the grid solution.

Scope of work included:

- Detailed design & engineering
- Manufacture of buildings to facilitate the project
- Transportation from Darwin to the Pilbara – 3500kms
- Detailed Project Management Services
- Supply & installation of
 - 400 rooms
 - Dining, office, recreation, gym, tavern and maintenance facilities
 - Underground services
 - Power station
 - Wastewater treatment facility & spray field
 - Water treatment facility

Project also included ongoing maintenance to the camp with 3 full time staff – carpentry, electrical, mechanical & plumbing services

The project was located within a remote location which had its challenges, NT worked closely with FMG to ensure a timely delivery during the wet season and through the Covid 19 period. This project was a credit to Northern Transportables Staff and Subcontractors commitment to delivery during an uncertain time with the Pandemic of 2020.
